TriVisc®

Fair and Consistent Pricing Helps You Make the Difference

For osteoarthritis knee pain, it's your skill that makes viscosupplements work. With TriVisc you get a clinically proven 3 injection product with the advantage of fair and consistent pricing — for you and your patients.

OrthogenRx prices it's products in a way that is affordable and reflective of the value they bring to patients and providers.

Pure¹

- Highly purified HA produced by bacterial biofermentation technology
- Removes the risk of avian allergies and sensitivities
- Consistent viscolastic properties, safe for repeat injection cycles
- Fully automated manufacturing process minimizes the risk of contamination and human error

Trusted

- 35 million doses administered worldwide¹
- TriVisc efficacy established by equivalence to Visco-3^{®2}
 - Visco-3 determined to be non-inferior Euflexxa^{®3}
- Supported by published clinical data
 - TriVisc exhibited improvement in WOMAC and VAS scores compared to baseline^{4,5,6}

TriVisc® Coverage

- Covered under Part B of Medicare
- Reimbursed under a unique reimbursement code: J7329
- OrthogenRx Reimbursement Hotline: 877-517-5445
- OrthogenRx Reimbursement Navigator: orthogenrx.aspnprograms.com

TriVisc Is Easy To Order

- OrthogenRx Customer Service Number: 877-517-5445
- Product Code: 50653-0006-04
- Supplied as a sterile, non-pyrogenic solution in 2.5mL prefilled syringe
- Each syringe contains sodium hyaluronate 25.0 mg with a stability established to 36 months

Description

TriVisc is a sterile, viscoelastic non-pyrogenic solution of purified, high molecular weight sodium hyaluronate. Each 2.5 mL of TriVisc contains 10mg/mL of sodium hyaluronate dissolved in a physiological saline. The sodium hyaluronate is derived from bacterial fermentation. Sodium hyaluronate is a poly-saccharide containing repeating disaccharide units of glucuronic acid and N-acetylglucosamine.

Indications and Usage

TriVisc is indicated for the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed to respond adequately to conservative non-pharmacologic therapy and simple analgesics, e.g. acetaminophen.

Directions for Use

TriVisc is administered by intra-articular injection. A treatment cycle consists of three injections given at weekly intervals. Injection of subcutaneous lidocaine or similar local anesthetic may be recommended prior to injection of TriVisc.
